

CraneServe

Total **Commitment** from **People** Who **Care**

We Are CraneServe

With extensive experience and knowledge of the industry, CraneServe has built up a reputation for excellent service and this has resulted in significant business expansion over the last decade. Regional offices along with field-based technicians covering the whole of the UK, give us the ability to offer our wide and growing range of products and services to you and your business wherever you may be.

At CraneServe we pride ourselves in our safety-first approach. CraneServe employ only proven and experienced specialist technicians with all staff members committed to delivering the highest standards of workmanship. Along with our commitment to continuous development of our workforce.

Independent

As an independent Crane Service company, we are not linked to one crane manufacturing organisation meaning we can offer impartial advice best suited to our client's needs. You choose the equipment based on your requirements; we include state of the art technology with our professional advice based on years of experience ensuring you get the best possible solution.

Services and Product

Inspection

Our experienced technicians maintain and service all types of lifting equipment to ensure your compliance with the LOLER and PUWER regulations.

We work on all makes of electric overhead travelling cranes, electric wire rope hoists, electric chain hoists, manual chain hoists and all types of lifting equipment.

Our qualified and competent staff can carry out statutory inspections to all your lifting equipment either as a one off or part of your crane or loose lifting item thorough inspection regime.

All these options can include full certification of maintenance/inspection of the equipment and can include colour coding to comply with your systems. Certification will be stored within our online portal, should you require copies in the future.

Maintenance

Preventative maintenance is the best solution.

Carried out as part of a Planned Preventative Maintenance (PPM) regime, our comprehensive automated reporting system offers a quick and simple over-view of your cranes condition together with suggested actions to ensure your crane stays in good working order. Sign a tailored planned preventative maintenance schedule with CraneServe saving both Time and Money.

We do offer this as a 'one off' maintenance project as and when required, perhaps before a busy time or outage for instance, giving you peace of mind.

Supply

Benefitting from over 50 years' experience in the lifting business and with strategic alliances with manufacturers, CraneServe can offer solutions to all your crane product requirements.

CraneServe is a UK dealer for GH Cranes and we supply the full range of GH products and parts. We hold stock in the UK ready for quick installation.

We're Here 24/7

CraneServe offer our customers a 24/7 'On Call' breakdown service anywhere in the UK in market leading response times. Should you experience a failure of your lifting equipment, our experienced and fully trained Technicians will respond to your situation and carry out the repairs to your lifting appliance.

Our technicians carry all the required PPE, IPAF certification for access equipment, risk assessment and method statements to carry out the task.

We pride ourselves on some of the best first fix ratios in the industry. Where this is not possible however, our customer focused team will do everything to make sure that the parts are found to carry out the repair in the shortest possible time. We are experienced in all makes and models of cranes, hoists, and other lifting equipment and with our strategic partners can obtain parts within the shortest possible time.
