

THE BRADBURY GROUP

The Bradbury Co., Inc., founded in 1959, has expanded its global presence and diversified its product portfolio through several acquisitions and ventures.

The Bradbury Group is a global family of companies dedicated to manufacturing industry-leading metal processing equipment for our customers.

ACQUISITION TIMELINE

Our fundamental beliefs and guiding principles define our organization's culture and behavior.

Live our values: We strive to live by our values at work and in our personal life.

Focus on the core: Focus on our core competencies and strengths - do what we do best.

Expand our solutions: We look for ways to innovate and improve. We are open to new ideas that help our companies, employees, equipment, and customers grow and evolve.

By following our core values, our Group of companies has a strong culture aligned with our mission and vision.

THE BRADBURY GROUP

A Legacy of Innovation and Excellence

BRADBURY

The Bradbury Co., Inc., located in Moundridge, KS, serves as the world headquarters for The Bradbury Group of companies. With over six decades in the industry, Bradbury started in 1959 as a roll-formed products division and a manufacturer of roll tooling for the metal-forming industry. In 1964, Floyd Bradbury designed the first Bradbury roll former for a company that produced awnings. Today, our equipment line-up encompasses technologically advanced roll forming lines, complete coil processing lines, levelers, and state-of-the-art automated production systems. Our facility is equipped with 75 machines, including lathes, mills, grinders, saws, and more, to machine all the major components required to assemble our equipment. We hold 28 active U.S. patents, two patent-pending applications, and 60 active international patents. When it comes to Bradbury equipment, you can rest assured that it embodies cutting-edge technology and is unrivaled in quality and longevity. Bradbury is committed to providing reliable, knowledgeable customer service through our technical service departments. We utilize the latest technology in remote diagnostics to ensure our customers are supported quickly, minimizing downtime. We have a 24-hour / 365-day service hotline to assist customers when required.

Company Acquisitions

Bradbury's roll-formed products division received its own identity in 1991 as Custom Rollforming Corporation (CRC). CRC now operates ten production lines in its Moundridge, KS, facility, forming an array of roll-formed metal products customized to customer specifications. CRC's production spectrum spans from simple to intricate parts in various shapes and gauges.

Bradbury expanded its portfolio by acquiring American Machine & Rollform Tech in 1996. American Machine has been a pioneer in crafting cutting-edge roll forming and hydraulic punch and cutoff machines since 1989. Manufactured at the Bradbury facility, The AMRT brand boasts state-of-the-art hydraulic punch and cut equipment, most notably the patented Viper® technology that has revolutionized the steel framing industry.

In January 1999, we welcomed Marion Die & Fixture (MDF) into the Bradbury Group. MDF, located in Marion, KS, specializes in crafting equipment for the tool and die industry, offering a range of solutions from progressive dies to punch and notch dies, door emboss dies, and cutoff dies. Their clientele spans numerous industries, including appliance, automotive, garage door, HVAC, lighting, metal building, and more.

Venturing into the Southern Hemisphere in July 1999, Bradbury acquired Hayes International, headquartered in Rotorua, New Zealand. Since its beginning in 1960, Hayes has been a globally acclaimed company and a trusted supplier of roll forming, slitting, folding, and related equipment for manufacturing roofing, wall profiles, structural sections, and other metal building and steel framing products.

2001 saw the inception of Beck Automation LLC, spearheaded by the knowledge and passion of Joe Beck, a veteran in the roll forming and controls industry. Beck Automation, located in St. Louis, MO, makes production equipment more efficient and profitable. Beck designs controls and related products for rollforming equipment, cut-to-length lines, tube mills, portable rollformers, and folding machines.

In 2005, Metform International Ltd., in Mississauga, Ontario, Canada, joined The Bradbury Group. Metform, established in 1968, manufactures roll forming equipment for the automotive, railcar, and heavy-gauge roll forming industries. Metform equipment has proven longevity and helps customers stay on the leading edge in the industry.

Bradbury Group Australia, Pty Ltd, a subsidiary of the Bradbury Group formed in 2010, brings together the expertise and innovation of three established leaders in the roll forming industry: Hilleng International, Die-Craft Engineering, and Hayes Australia. Bradbury Group Australia is at the forefront of manufacturing sandwich panel laminating machinery and systems, and they are a premier roll former manufacturer of rainwater products.

Alliance Machine and Engraving, LLC, based in Ashland, VA, joined forces with The Bradbury Group family of companies in 2011. Manufacturing capabilities for Alliance span a diverse range of products and industries, encompassing embossing machines & rolls, calendering equipment, and composite lumber machines for metals, non-woven, geotextile, paper, and composites.

The Bradbury Group welcomed Athader S.L. into The Bradbury Group family in 2012. Located in San Sebastian, Spain, and founded in 1992, Athader is a trusted manufacturer of slitting lines, blanking lines, flying shears, stacking and packing equipment, and much more for the coil processing industry. Combining their expertise, The Bradbury Co., Inc. and Athader have the coil processing equipment solution for lean manufacturing, scrap reduction, and increased efficiency.

2014 saw the addition of Bradbury Group Pu.Ma. to our ever-growing family. This acquisition aligns with our growth strategy and broadens our product offerings to include continuous PUR / PIR insulated sandwich panel equipment. Bradbury Group Pu.Ma. serves the metal building, cold storage, HVAC, garage doors, entry doors, and injection molding industries.

In 2015, The Bradbury Group unveiled Bradbury Metal Tile Roofing Solutions LP, based in New Zealand, established to serve the global metal tile roofing industry. A BMTRS metal tile production line can manufacture multiple exposed and hidden fasten metal tile profiles and ridge cap profiles. For an entry-level solution, a company may purchase customized die sets and partner with a contract manufacturer to produce metal tiles.

Attica Precision Machining joined our Group in 2022. The facility, located in Attica, KS, has a comprehensive suite of services encompassing sawing, sub-assembly welding, polishing, precision turning, and machining. Their expertise in precision turning allows products with dimensions of up to 14 inches in diameter by 83 inches in length. Additionally, it offers precision machining capabilities extending to 41 inches in length, 41 inches in width, and 51 inches in height.

Bradbury acquired Press Room Equipment Co. in 2023. PRE has over four decades of experience designing and manufacturing high-quality equipment for metal stamping and fabrication industries. PRE builds stock reels, pallet decoilers, straighteners, coil upenders, press feed systems, high-speed precision servo feeds, and automated processing lines in their Springfield, MO, facility. In addition to the PRE brand, the acquisition includes the Norwalk and Waddington Electronic brands.

The Bradbury Group continually expands its horizons, embraces technological advancements, and maintains an unwavering dedication to customer service.
